

## THEDATASAFE Transparency

---

### **Transparency**

#### **No advertisements**

No Banners, popups or takeovers.

#### **No profiling**

THEDATASAFE does not sell your usage data to advertising companies.

#### **End-to-end encryption**

By far the best way to protect your data in our datacenters.

At THEDATASAFE, administrators cannot read your data because they are encrypted on our servers, only your password can allow you and you only to read them.

THEDATASAFE is not financed by ads, only by your payment of your subscription to our different plans or services. Your personal data or the content of your data are never sold or rented to anyone, and it will not be used for any third party advertising.

THEDATASAFE regularly publishes Transparency Reports (available [here](#)) in which we disclose details about requests from law enforcement.

THEDATASAFE uses open-source cryptography developed by the ownCloud community to encrypt all content. The source code for data handling is available to the public under the GPL License. This means that anybody can review the source code.
